

Unit 2b

Dictionaries

Create A Dictionary named `pizza` with
keys: `size`, `crust`, `toppings` and
items: `small`, `thin`, `[pepperoni, onion]`

- 1) Print the dictionary `pizza`
- 2) Print only the keys of the dictionary
- 3) Print only the items of the dictionary
- 4) Print the length of dictionary
- 5) Use the `get` method to print item under the key `crust`
- 6) Add a key: `calories` with value 500
- 7) Use the `get` method and print "Sorry, Not found" when trying to print the value of key named `box`.
- 8) Remove the key `size` and store it in a variable and print the variable
- 9) Create a dictionary that includes
keys: `name`, `address`, `state`, `zip`, `email`, `phone`
with values of your choice. Use a for loop to print all keys and values of the dictionary
